

“LOCAL CLIMATE HISTORY–NORTHERN WESTCHESTER WARMING”

Title: “LOCAL CLIMATE HISTORY–NORTHERN WESTCHESTER WARMING”

Location: Yorktown Community Center (Nutrition Rm), 1974 Commerce St., Yorktown Hts.

Description: By Yorktown volunteer observers Daniel Thaler (2014-2017) and Jerome Thaler (1964-2014). Northern Westchester and Putnam National Weather Service (NWS) records since the 1890s show the last two decades have been the warmest. These two dedicated weather observers have recorded weather conditions daily for the NWS. This presentation reveals the weather extremes both on a monthly and annual basis for our local area. Other aspects on climate will also be shown. In 2013, Jerome put out a book “Hudson Valley Warming”. His son Daniel is now the local observer for NWS. Is there a ‘Hot Time in the Old Town’?

Start Time: 19:30

Date: 2018-01-18
